Portuguese water dogs have traditionally cropped on their faces, hind legs and part of their tail, leaving an abundant plume at the end. The front end of the canine coat remains to grow naturally. The coat is described as plentiful. There are two different types born without sububs:(a) Hair is quite long and freely waving light shed; hair on the head straight-standing, the ears are well feathered. (b) Hair short, quite harsh and dense, compact curls, lacking shine, head hair similar to the body, hair on the ears somewhat wavy. Necessary equipment: brush-pin Slicker/pin, wide-toothed comb, clippers. The pet dog can be clipped to about 0.5 inches (1.25 cm) throughout - it's called Retriever trim and used to show in the U.S. brush through coats, removing tangles. Using the Oster No 10 or 15 blade, press your face from the corner of the ear to the ear angle in a straight line. Fasten the muzzle from the occia. Attach the neck to the point of the throat. Trim the abdominal area. Squeeze the full back foot off the last rib, including the back throw, with the Oster No 10 or 15. Trim the tail two-thirds from the base to leave the plumage on the other third. Cut the hair between the pads under the legs. Bathe the Portuguese water dog in the appropriate shampoo and apply air conditioning. Sell the hair dry with a pin brush, then comb with a wide-toothed comb. Don't forget to check your dog's nails, ears and teeth. As the groom the coat of the Portuguese water dog was last modified: May 22, 2013 by zslomt1778 Oh, a lovely Portuguese water dog. Interesting name and great companion—and we mentioned that even former President of the United States Barack Obama is a fan? For (the First Family dog) and other parts can actually be traced back to dogs that lived along portugal's coast, snoring fish into nets and helping fishermen with other sea-oriented tasks. Strong, muscular and hardworking, this breed is still used to save water because of their impressive abilities in the water. They were introduced to the United States in the 1950s, and have since gained a following - especially among people who love smart, sassy and super active dogs to take along on adventures. However, you have to keep them busy and entertained because they have an uncanny ability to get into pranks. But a lot of time outdoors (and in the water!) will keep them happy, loving and companions. Their beautiful locks also arrange them and make them one of the most hypoallergenic rocks around. These locks still require some maintenance on your part, however. Not quite sure where to start? Let's help you with information about some Porti's most popular haircuts around. We promise to make it fun and help you keep your puppy looking healthy and fresh. Grooming tips But first, a few quick tips for care will help you on your way. Porti has two different types of coats: one has compact curls and the other has fur that is more wavy with a light shed. There's no malnutrition to deal with, but you have to be in to look for tangles and mats with this kind of coat. It's best to clean and comb these guys every day to keep them in good shape - a sturdy brush-stain is usually the best choice when it comes to getting through that fur, and a comb can help with stubborn tangles. As we mentioned, this breed is quite highly serviced, so you'll want to give them a full coat finish every month or so. Keep an eye on your own grooming schedule several times a week between visits. Regular baths (every month or two) are also a good idea for this breed - they will help with tangles, matting and keep them smelling oh-so-fresh! Just make sure to rinse that thick fur thoroughly, you don't want leftovers to irritate the skin. Speaking of smelling fresh, brush your portly teeth every week to keep your mouth and plaque under control. Top Portuguese water dog shearing 1. Retriever Clip Wikicommons This haircut is a simple, classic clip for Porti, where all the coat is trim to about an inch all over their bodies - carefully adhering to their natural contour. The legs are combined with the rest of the body, but the legs are slightly rounded at the end. The head also fits into the body, except on top of what may look cloned. A few more special tricks? The ears are trimmed, the muzzle is also cut short and even (there are no beards here), and the tail already has hair at the end. 2. Leo Clip Wikicommons Looking for a style that will really make your puppy stand out? Well, this lion clip takes things to a whole new level. This cut is unique in that the entire back half of the dog coat is completely trim (except for the puta hair on the tail, of course). The fur on the front of the body follows the contour of their shape, but longer than the retriever clamp by a few inches. This look is a real show-stopper, but tends to be a little more intense to keep up. 3. Summer clip Wants to keep your puppy's coat even shorter? While not quite as common, the summer clip warms up perfectly for warm weather when your dog spends a lot of time in the water rolling around in the mud, and usually needs a lot of extra cleaning. It's a practical cut as well as keeping the fido looking dapper and sweet. A few other thoughts about the Portuguese water dog However you decide to groom your puppy, they will look great, fluffy and oh-so-enjoyable - and you'll be happy once you find the right style that fits into your family (and budget and free time). Just don't forget to always pay attention to the signals your dog gives you, and if something causes them stress, then maybe it's time to find a different approach/hairstyle/groomer/etc. we hope these hairstyle ideas Grooming tips were useful for jazz up your puppy's coat. Happy clipping! Need dog care? Does your dog need a fresh finish? Grumer can now come to your house! The rover offers dog care in Seattle, Austin, Washington, D.C. and Denver.
